WHERE AMBITION *MEETS OPPORTUNITY*

COLLEGE GUIDE 27/28

Buckinghamshire College Group

“Thank you for picking up our College Guide...I am delighted you are considering studying at Buckinghamshire College Group where you will find a passionate community of staff who will inspire you, challenge you and support you to go ‘Beyond Ambition’. We focus on providing high quality vocational and technical education to ensure that you are well prepared for your next step, whether that is university, a job or an apprenticeship.

Not only will you leave us with an industry recognised qualification, but you will also have gained a broader set of work readiness skills, developed with employers to ensure that you are future ready. We have a dedicated WorkZone team that will help you secure valuable work placements, and a wide range of support staff who provide excellent pastoral and academic support every step of the way.

We believe in providing you with amazing learning opportunities in an inclusive environment where everyone can be successful. Our students speak highly of their experience at college, and our results reflect that. We have exceptional links with employers in key industry sectors and support great routes to university. Our students go on to achieve amazing things, and we look forward to offering you the best possible start to your career and helping you to realise your ambitions.”

SEARCH BUCKS COLLEGE GROUP

WHY CHOOSE US?

Our goal at Buckinghamshire College Group is to prepare our students for their future careers.

We believe that the learning experience they gain with us is critical in setting our students ahead of the competition and helping them to develop and excel in their chosen occupation.

We are a modern and progressive further education college with an excellent track record and are proud to offer a wide choice of vocational and technical courses from full-time study programmes, part-time courses, professional courses, apprenticeships, and higher education programmes.

We are proud to work with a wide network of local employers who are as committed as we are to our students all year round. We are the largest apprenticeship provider in the area with a history of delivering excellent results.

Our buildings have state-of-the-art facilities filled with specialist and professional equipment, salons, studios, and workshops. Our students and apprentices work alongside teachers and industry experts who help them learn about what it means to be a professional in their chosen field.

During their time at Buckinghamshire College Group, students quickly discover the importance we place on preparing them for their future career; whether that's progression to university, an apprenticeship, or straight into full-time work.

We want our students to be the best they can be and always work alongside them in helping to achieve their goals.

Expectations at Buckinghamshire College Group are like those found at work. We expect that our students have ambitious standards of work, are punctual, respectful, and have a good attitude to learning both in and out of the classrooms and workshops.

While studying with us, students undertake work experience and work related activities; while continuing to improve their English, Maths, and Digital Skills. All of this helps students build their CVs and gain experience that makes them stand out from others when they complete their studies.

With the support of our teachers, course leaders, progress coaches, careers advisers and Student Services team, learners have everything they need to succeed. Whatever path they choose, studying at Buckinghamshire College Group is about more than achieving a qualification. It's about discovering new possibilities, developing the skills employers value, and taking the next step towards a successful future. It is where ambition meets opportunity!

NEW CAMPUS

COMING SOON...

WHERE WILL I STUDY?

The Bucks College Factor is all about helping you develop the skills you need to advance in your career. That means working with the latest industry-standard facilities and technologies, so you can gain real-world experience and prepare for the world of work. All our campuses offer affordable refectory services, learning resource centres, and ample outdoor spaces to relax between classes.

Aylesbury campus

Our **Aylesbury campus** is purpose-built with specialist workshops for all our Construction and Technology, and Creative and Digital Arts programmes including upgraded facilities for Plumbing and Gas skills. We have a recently launched the Green Energy Skills Hub, which helps students develop skills and knowledge in renewable technologies. Our Hair and Beauty students operate a fully functioning Salon with dedicated training suites, while our Healthcare students learn in simulated hospital environments within our new Health Wing. We have recently upgraded our Business Management facilities to offer modern, collaborative and industry-standard learning spaces. Our new Learning Centre also provides a mixture of independent and collaborative study spaces to support different learning styles.

Wycombe campus

Wycombe campus houses first-rate workshops for Carpentry and Motor Vehicle training, which sit alongside spacious facilities for other Construction and Technology offerings. The campus features a modern gym and 3G football pitch built with support from the FA to their latest standards, and recently upgraded suites for Healthcare, Childcare, and Science. The campus is also home to the Future Life Centre, a purpose-built facility designed to help young adults with high needs integrate into society.

Amersham campus

Just a short walk away from the Metropolitan line, **Amersham campus** is a hub of creativity, featuring workshops for Art & Design subjects, including dark rooms, print and ceramics studios, and design suites. The campus also features a 120-seat commercial indoor theatre and an outdoor amphitheatre, ideal for hosting events and music performances. TV, Film and Media students benefit from recently upgraded TV studios, editing suites, and motion capture equipment. With close links to local industry, some of our courses are based at Pinewood Studios.

WHAT IS NEXT FOR BUCKS COLLEGE GROUP?

"We are delighted to share that plans for our new purpose-built campus in the heart of High Wycombe are progressing well. The transformation of our Oxford Road and Brook Street sites is now underway, bringing a significant new development to the town and paving the way for an anticipated opening in September 2028.

The new campus will become a centre of excellence for technical, professional and vocational education, serving learners across South Buckinghamshire and beyond. We continue to work closely with key partners, including Buckinghamshire Council, Buckinghamshire New University and local employers, to bring this ambitious vision to life.

As we move closer to opening, we will develop a comprehensive transition plan for students currently studying at our Amersham and Flackwell Heath campuses. This will include guidance and support for travel arrangements, ensuring students and their families are fully prepared for the move.

We are excited to share more details as the project progresses. From 2027 onwards, regular updates and information about the transition plans will be available on the College website, so keep an eye out for the latest news as we begin this exciting new chapter."

WHAT CAN I STUDY?

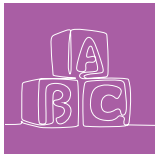

The College covers a broad range of subject areas, with varying levels of study available. No matter where you begin, our courses will equip you with the skills and resources you need to achieve your desired career.

It is important to us that you have a pre-existing passion for the subject matter you are applying for, and we will ascertain this during the application process. However, we also understand that you may not know which direction you are heading, but do not worry, you can apply for as many options as you would like; and our Admissions team, curriculum staff, and careers guidance specialists can help set you on the right track.

Whichever option you choose, we will provide a highly versatile, exciting, and challenging course, taught by highly qualified staff with a range of experience and vast expertise, in exceptional industry standard learning environments.

WHICH ROUTE IS RIGHT FOR ME?

With so many options, careers, and progression routes available, choosing the right path for you can be difficult. Whether you've just left school, taken a break from education and are now ready to gain qualifications for the world of work, looking to study at a higher level, or planning to go to university, we're here to help you find the course and level that's right for you.

There are a range of qualification types which you receive on completion of your course. These are set to a National Standard to ensure that different qualifications at the same level expect a similar standard of work. The level structure groups qualifications together to provide a consistent way of assessing each level of achievement. For example, a T Level is equivalent to three A-levels.

Full-time Study Programmes: A combination of practical and theory-based lessons taught in class and through self-directed study on campus and work experience. This includes T Level courses, a new qualification that focuses on high-level technical study and work-ready skills. They have been developed to offer a credible technical alternative to A-levels and will provide young people with a clear route to skilled employment or higher-level study.

Apprenticeships: Earn and learn at the same time and gain valuable hands-on experience along with new skills and knowledge in the workplace.

Part-time and Higher Education: For those who are looking to improve skills and knowledge in a current job role, gain employment, searching for a career change, or thinking about trying something new in their spare time.

So, if you are unsure which course is right for you, which qualifications you require for a particular level of study, and what skill level you can expect to gain, then please visit our website to use our handy course explorer. Alternatively, come and ask your questions in person at one of our Open Events.

FULL-TIME STUDY PROGRAMMES

All our full-time students, aged 16-18, are enrolled onto our purposefully designed 'Bucks College Group Study Programme.' We are ambitious for you to succeed, so our study programme has been formulated to prepare you for the future. This means as well as studying your chosen course, you will also work on important skills to help you to progress positively in life and your future career.

1. Your Subject & Qualification

We offer a range of educational choices, from entry level to pre-degree, supported by modern resources, inspirational teaching, and purpose-built facilities. Our technical and vocational qualifications involve studying both the theory and practical elements of a subject. This allows you to develop the occupational skills, knowledge and work-ready behaviours to successfully progress in your chosen industry.

The way we deliver each qualification has been developed in collaboration with employers so that the content meets the needs of the industry and prepares students for work or further study.

2. The WISPA Tutorial Programme

All study programme students will take part in our WISPA tutorial programme which covers topics linked to Wellbeing, Inclusivity, Sustainability, Professionalism and Ambition. The WISPA programme will support you to keep both mentally and physically healthy, promotes a culture of respect where discrimination, bullying and harassment are not tolerated, focuses on how you can contribute to the sustainability agenda and helps you to explore and prepare for future careers. You will be supported by a Progress Coach to set and review individual targets, helping you to make informed decisions about your next steps and overcome any barriers to success. We also have a qualified careers advisor who can provide free, confidential and impartial advice to all students.

3. Work Readiness, Work Experience & Industry Placements

All full-time students are expected to engage in work experience activities to support the development of their work readiness skills. This supports their progress towards completing a set number of hours of work experience or industry placement appropriate to their development needs, career aspirations and achievement of their qualifications.

Our dedicated WorkZone team provide help to match you with employers to find suitable work placements and will support you through the process. If you are eligible for support with expenses such as travel and subsistence, you will continue to receive it.

4. Enrichment

Your learning experience will be enriched with a range of exciting opportunities. This includes day visits and residentials, employer led projects, skills-led masterclasses from occupational experts, sports activities, social actions projects with the local community, clubs and societies.

5. English & Maths

We know that strong English and Maths skills are essential for future careers and life, and we are committed to helping you develop these throughout your programme of study. If you have yet to achieve your GCSE English and/or Maths at grade 4 or above, you will need to commit to a GCSE resit or functional skills course which will be integrated into your timetable.

“The Bucks College Group Study Programme is designed for full-time students to develop the skills, knowledge, and behaviours required by employers and relevant industry sectors. Programmes are designed around work readiness, skills to future proof our students, and include a technical or vocational qualification, English and Maths, a comprehensive tutorial programme, work placements and enrichment activities such as skills masterclasses.

This careers-focused curriculum is delivered by skilled teachers who have high aspirations for students and provide a strong background in industry with a wealth of subject expertise. Coupled with strong pastoral support we equip all students with the knowledge, skills and behaviours to achieve their future career and life goals.”

HANNAH JAMES

Vice Principal – Curriculum and Quality

T-LEVELS

THE NEXT LEVEL QUALIFICATION

T LEVELS

T Levels are a new, two-year qualification for 16 to 19-year-olds, designed to follow GCSEs. Equivalent to three A-levels and carrying UCAS points, they offer pathways into skilled employment, an apprenticeship, or higher education study.

T Levels combine classroom theory and practical learning with a 45-day (or in some cases more) industry placement to ensure students have an authentic experience of the workplace. Developed in collaboration with employers, the course content is tailored to meet industry needs and to prepare students for the workplace.

Around 80% of your time will be spent at college with the remaining 20% being spent on your placement. Experience with a real employer in a real workplace will allow you to apply the skills and knowledge you learn in the classroom to the job once you complete your studies.

T Level courses include the following compulsory elements:

- A technical qualification that covers core theory, concepts, and skills relevant to a specific industry area.
- Specialist skills and knowledge for an occupation or career.
- An industry placement with an employer.

LEARNING IN THE WORKPLACE

Whether you are starting out in your career, developing new skills, or looking to progress in your current role, Buckinghamshire College Group offers a range of training and qualification routes designed to support learning in real workplace settings.

Many professions require more than classroom-based study alone. The most effective learning combines technical knowledge with the practical skills, behaviours and experience that are developed through real work activities. Our programmes are designed to help individuals gain recognised qualifications while applying their learning in the workplace.

We work closely with employers across Buckinghamshire and beyond to ensure our training reflects current industry needs and prepares learners for success in their chosen profession.

Our workplace learning provision includes:

Apprenticeships combine employment with structured training. Apprentices are employed by an organisation and develop the knowledge, skills and behaviours required for their role through a mixture of workplace learning and off-the-job training. Apprenticeships provide a practical route to gaining nationally recognised qualifications while building a career.

Skills Bootcamps

Our Skills Bootcamps are designed to help individuals develop specialist skills that employers need. Many of our bootcamps focus on emerging sectors such as renewable and green technologies, supporting employees to upskill, progress their careers and increase their earning potential in a rapidly changing economy.

Workplace Diplomas

Workplace Diplomas enable individuals who are employed or undertaking relevant voluntary work to gain recognised qualifications through assessment in their work setting. Learners demonstrate their competence in real-life situations while receiving guidance and support from experienced tutors and assessors.

WHY CHOOSE WORKPLACE LEARNING?

Learning in the workplace enables individuals to apply their knowledge in real situations, building confidence and competence alongside experienced colleagues and industry professionals.

Our workplace learning programmes help learners to:

- Gain nationally recognised qualifications relevant to their role.
- Develop practical knowledge, skills and behaviours in a real work environment.
- Apply learning immediately within the workplace.
- Improve confidence, competence and professional credibility.
- Progress within their current role or prepare for future career opportunities.
- Develop skills that meet current and future industry needs.

Supporting Employers

Workplace learning also helps employers develop a skilled, qualified and productive workforce. By investing in training, employers can address skills gaps, support staff development, improve retention and build the capability needed to meet future business and industry demands.

Our Apprenticeship & Skills Team works closely with both learners and employers to provide advice, guidance and support throughout the learning journey, ensuring training delivers real value for individuals, organisations and the wider economy.

APPRENTICESHIPS

The College has been offering apprenticeships since they started in the 1990s and we are now the largest apprenticeship provider in the area with a track record of delivering excellent results. We work with a network of local employers who are as committed as we are to ensuring that their employees are fully supported to succeed.

An apprenticeship is a workbased training programme which includes both formal and informal on-and-off-the-job training. There is an End Point Assessment which confirms you are working to the industry expected occupational standard. It is a real job, and apprentices must be employed for at least the duration of their apprenticeship training. The vast majority of our apprentices are retained by their employers at the end of their apprenticeship and continue to have successful careers..

Our apprenticeships last for 1 to 5 years, depending on the subject area, and/or higher levels.

An apprentice must have time away from their immediate work tasks to undertake planned off-the-job training. The perception is that apprenticeships are often focused on young people aged 16-18. However, they can be used to support people of all ages, as well as an existing workforce to develop skills and support a career in a new occupation or job role.

Apprenticeships are available in a wide range of occupations and industries. We make sure that every apprenticeship is relevant and appropriate for both the apprentice and the business. The level of apprenticeship is determined by matching the job role to an Apprenticeship Standard. Applicants will be assessed by the employer and the College to determine their suitability for the role and apprenticeship study. Factors influencing suitability include qualifications already held, experience of the workplace and experience in the job role.

So How Much Will You Be Paid?

You are entitled to the relevant apprenticeship national minimum wage. The minimum wage for apprentices is £8.00 per hour (as of April 2026), but many employers pay more than this. This is dependent on the sector, region, age, and apprenticeship level. For example, some higher apprentices can be paid as much as £18,000 per annum as a starting salary.

Being at Work

Your employer has an essential role to play in developing their apprentices' skills and experience as part of your apprenticeship programme. You will receive off-the-job training relevant to your apprenticeship programme. You will also be supported by us to complete your apprenticeship training and prepare for the End Point Assessment. This is vastly different from school. It is a fantastic opportunity to sample new experiences and develop new skills.

To start an apprenticeship, you will need to be:

- 16 or over
- Live in England
- Not in full-time education

If you are interested in an apprenticeship, you can apply for specific job roles via the National Apprenticeship Service. We will invite you to come in for an information and advice meeting, or we will visit you at work, to help you decide if this is the right choice for you.

WHAT IF I AM OVER 19?

We have a range of higher education and part-time courses exclusively for those aged 19 and over designed to help you reskill or upskill or even take up a new hobby!

Options include Accountancy, Construction, Counselling, Hair & Beauty, Health and Social Care, Human Resource Management, English, Maths and Art & Design with many courses starting throughout the year. If university is your aim, please look at our Access to HE courses which are specifically designed to prepare you for university study and get you the grades you need.

Look out for our Skills Bootcamp courses, which are short courses designed to help you develop new skills that employers are looking for. Many courses also have flexible study options enabling you to fit them around family and work commitments. There is so much to choose from, so visit our website to find out more.

We also offer a range of employability programmes designed to help adults who are unemployed, underemployed or looking for a career change. Developed in partnership with local employers, these programmes help you build confidence, develop the skills employers need and prepare for real job opportunities in your area, supporting you into sustainable employment and career progression.

Worried About the Cost?

We want to remove all barriers to learning where possible. Everyone should feel empowered to take positive steps into education that could transform their lives. Some of our adult courses are free, and you may be eligible for part funding for others depending on your circumstances. Advanced Learner Loans are also available to help adult learners aged 19 years or over to manage the costs of further education and training. We have lots more information about the financial support packages available on our website.

YOU SCARE MY CAT
DM

WHAT DO OUR STUDENTS SAY?

I have **achieved independence** and improved my ability to plan things effectively.

I have learnt many skills required for the trade I am working towards and felt well looked after at the College.

The course, teachers and classmates have been **amazing**.

My teachers are lovely and supportive. They gave me a lot of experience when it comes to college, meeting new people, learning from my course and helping me to improve my GCSE.

The teachers have been the best part as **I feel free to communicate** with them without worry.

The College has **good digital facilities** and technology.

There is a lot of support in place at the college. It is a non-pressured and **safe environment** in and out of classrooms.

College has really **helped me become more confident** about working in a professional environment one day, as I've gained many hours of work experience both inside and outside of college this academic year. **I also really like the members of staff.**

"I like this college because it **gives good support**, the teachers and staff are **kind and helpful**, I feel as though I'm able to talk to them about any concerns about myself or others. This college also has good support in terms of helping you with what you'd like to do next in life, whether that's going into a full-time job, going onto a different course somewhere or whatever it may be.

The staff are very helpful, and the events are fun.

LET'S GET SOCIAL!

SEARCH BUCKS COLLEGE GROUP

The best way to get a feel for our student experience, is to follow our social media channels. We are always celebrating our great college and everything that our students and staff get up to.

Student

WHAT IS STUDENT LIFE LIKE?

Our College is made up of a diverse community of people, all of whom have their sights set firmly on a great career. We take pride in our welcoming environment, excellent track record for pastoral support, enhanced student experiences through extra-curricular enrichment, and our expert teaching. You will have access to some of the best industry-standard workshops and facilities during your studies and will benefit from practical experience with tutors who have all worked in the industries they teach.

Your college journey will go further than the classroom. You can expect course-related trips, experiences, and guest speakers throughout the year. You will have opportunities to explore real working environments and engage with professionals working within your chosen field of study.

There is so much happening in and around the College. If you are keen to develop new interests, make new friends or play sports, we have a variety of clubs and societies to experience. We also encourage students to make use of additional learning areas, a well-being garden, on-site student services, affordable cafeterias, and generous student discount schemes. We will support you every step of the way; with events such as our annual Freshers and Higher Education Fairs, welfare and finance support through our Student Services team, and progression advice, such as our UCAS workshops and careers sessions.

Student Engagement Team

Buckinghamshire College Group values its student voice, and our Student Engagement Team (SET) is at the heart of this. Led by students, for students, the SET is made up of Student Governors, Curriculum Representatives, Apprentices and Student Ambassadors. Together they make sure the views of every student are heard, including full-time, part-time and adult learners, apprentices and those studying with our partners.

Throughout the year the SET gathers feedback through focus groups, surveys and regular Curriculum Representative meetings. The key points in the cycle are:

- Your first six weeks
- Safety and wellbeing in the autumn
- Progress in the spring
- Next steps in the summer

Our two elected Student Governors sit on the College's Corporation. They report student views each term to governors, so your experiences directly shape College decisions. We share what has changed through our "You Said, We Heard" updates. Whether you'd like to become a Representative or Ambassador or simply share your views in a focus group, there are safe and supportive ways for everyone to get involved.

WHAT SUPPORT IS AVAILABLE?

Student Welfare

Your safety, welfare and wellbeing are our highest priority. All students have the right to feel safe and protected, whether on campus, online or taking part in college activities. Our trained Safeguarding Team, including Designated Safeguarding Leads, acts promptly on any concern. We work closely with families and external agencies where needed to keep you safe.

Student Services teams on every campus offer confidential, non-judgemental support with wellbeing, personal circumstances and anything affecting your studies. If you are worried about yourself or someone else, you can raise a concern through your student portal, speak to any member of staff, or visit Student Services. In an emergency, always call 999.

Student Finance

We understand that the cost of studying can be a worry, and we don't want money to be a barrier to your education. Through the College Support Scheme (CSS), we offer financial help to eligible students of all ages towards course-related costs. These include travel, equipment, uniform and kit, books, DBS checks and trips. Eligible students may also receive Free College Meals.

Help is also available with childcare costs. Student parents under 20 can apply through the government's Care to Learn scheme, and the College can help older learners with childcare costs. Applications are made online, and our Student Services team can guide you through the process and the evidence you'll need. We encourage you to apply as early as possible, so support is in place from the start of your course.

College Transport

Having difficulty figuring out how you are going to get to college? We work closely with the local Buckinghamshire Transport networks to make our campuses accessible. We also run our own daily bus services between Aylesbury and Amersham, and Amersham and Wycombe. If you choose to use our bus services, you must purchase tickets before your journey. Tickets are available from the campus reception. All three campuses benefit from car parks where our students can park with a permit. Permits are available from our online store.

SEND SUPPORT

SEND Support is a service for students who might need some extra help while studying with us. We can provide additional support for you if you have a learning difficulty, disability/medical condition, literacy and numeracy need, or a language need. It is available to all students subject to assessment and agreement of need and resources.

As a student, the Digital Learning Innovation Team will provide you with access to a cutting-edge Virtual Learning Environment which acts as a portal to all your college digital services.

All Students have a Student Space, a digital area where you can monitor your progress, set ambitious targets, track attendance and more. This can be shared with parents or carers too via our Parent Portal.

You will have access to PCs, Macs, Chromebooks, and iPads to assist with your studies, along with free Wi-Fi if you wish to bring your own devices. To further support students, we have an Inclusion Hub at each campus

Our Inclusion Hub can help and support you with coursework and any upcoming assignments.

HOW DO I ENROL?

Attend an Open Event

The best way to start your journey with us is at our Open Events. You will be able to find out what the College offers, meet our tutors and see our facilities. We have events scheduled throughout the year, but places fill up fast!

Apply online

Applying is easy, everything is online which means that you can make your application quickly and simply and we receive it straight away. If you do get stuck or have any questions, our Admissions team are there to help. You will need your basic contact information, and you will need to answer a couple of very quick questions about your learning needs. Once submitted, our Admissions Team will soon be in touch to arrange next steps.

Kickstart Events

Our new Kickstart events are designed to replace traditional interviews and give you a real taste of college life. During the event, you'll:

- **Meet Support Teams:** Chat with Student Services and Learning Support to discover how we'll help you thrive.
- **Hear from the Curriculum Manager:** Parents will receive a detailed overview of the subject and study programme.
- **Connect with Maths & English Staff:** Learn how our Maths and English provision fit into the study programme with the opportunity to ask the team questions.
- **Try a Practical Taster Session:** Experience a hands-on class with a teacher and fellow prospective students.
- **Receive a Conditional Offer:** Based on your experience, you'll be offered a place on the course that suits you best.

Next Steps

Once you have received your offer then you are all set! Our enrolment sessions usually start straight after GCSE results day, but we will contact you with all the relevant information including dates, times, and what you will need to bring. At enrolment, you will be given a Student ID and a timetable outlining your first week at the College.

WHEN CAN I VISIT?

Our Open Events are the perfect chance to explore our campuses in person, view our facilities and speak with tutors from all subject areas. You'll have the opportunity to tour the College, visit workshops, studios, and learning spaces, and see our students and staff in action.

These events which take place in November, January, March and June always prove to be immensely popular so book your space now!

WHO CAN I TALK TO?
