

Art & Design – Transition Activity

Thank you for choosing to study Art & Design at Buckinghamshire College Group (Aylesbury campus). We look forward to seeing you in September. This course will cover a variety of art and design skills that will have overarching themes for your assignment briefs. You will study printmaking, drawing skills, mixed media and 2D & 3D design. Before you start the course, the Creative & Digital Arts team would like you to complete a task based around what you will be studying.

Documentation – using a variety of media, document your world around you. Use observational drawings, photography, inanimate objects, life drawing, portraits, landscape, nature...anything involved in your current surroundings.

Your designs **MUST** be originals and not copies of any existing art. You can collate all of your work into a sketchbook. You can use any materials you desire to create your art. You should show a mood-board of examples of inspiration for research and this should be annotated with your thought process.

You can use the Internet to gather inspiration and use books if you can access them.

Have fun with it and be creative!
