

# TRANSITION IDEAS

We are really pleased you are joining our SFX Course next year and hope you are excited about all the new skills you are going to learn. There is a lot of amazing information out there as well as a lot of free tutorials and projects on line which you could try out, some are listed below.

Before you start next term we would like you to produce something creative to show us at the start of your course.

## Mini monster challenge

Using anything you can find.... A sock, clay, lego or even a vegetable, create a mini monster. One of our tutors created a very simple version - Celeriac Man! Now its down to you! Looking forward to seeing your monsters in September!
