Level 3 Business

We are really pleased you are joining our level 3 Business course in September and hope you are excited about all the new skills and knowledge you are going to learn.

Before you start next term we would like you to start thinking about one of the business challenges you will have to complete in the first few weeks of your course.

£2 Challenge!

Task: To come up with a business idea to turn £2 into as much money as you can!

Details:

- You need to come up with some ideas as to how you will increase the initial business investment of £2. Here's one to start with Cleaning car windows for 50P.
- When you start at college you will be allocated a team and all the team Ideas need to be captured and put into a business plan.
- You have approximately four weeks (date to be confirmed in your induction), when your total funds will need to be submitted in class.
- The team(s) who raise the most money will win a prize!

Rules:

- Any activities undertaken to generate income must be legal; any activities which are deemed unacceptable by the college may result in disciplinary procedures.
- On the closing date, the original £2 investment must be returned to the college.
- All additional funds are to be donated to charity of the year! This will be administered by the class tutor.
